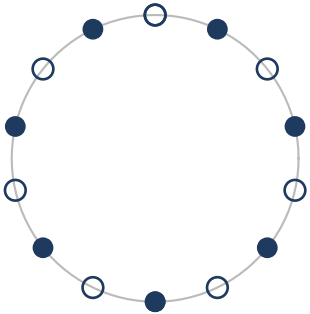
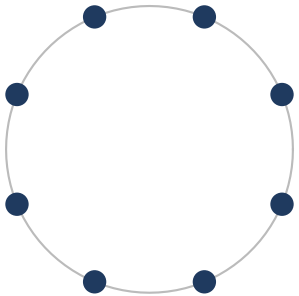
Normalised Frobenius eigenvalues $\omega_i/\sqrt{q}$ of the rank-8 Witt sheaf, $q=4$: $\lambda_1=0$ filled, $\lambda_1=1$ open

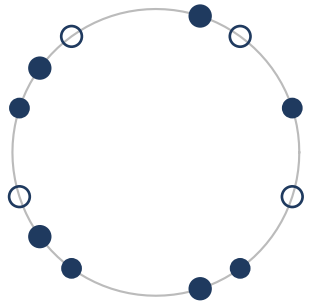
type $7\,1$, $\lambda=(1,1,1)$ over $\mathbb{F}_4$
$(\omega_i/2)^N=1$, $N=28$



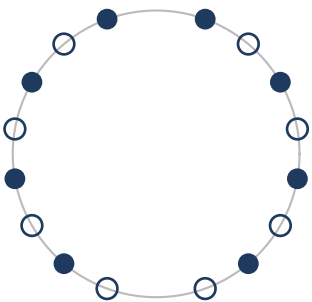
type 8, $\lambda=(1,2,2)$ over $\mathbb{F}_4$
$(\omega_i/2)^N=1$, $N=16$



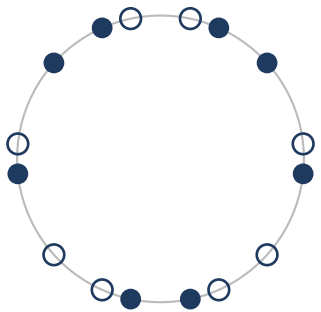
type $5\,2\,1$, $\lambda=(1,0,2)$ over $\mathbb{F}_4$
$(\omega_i/2)^N=1$, $N=20$

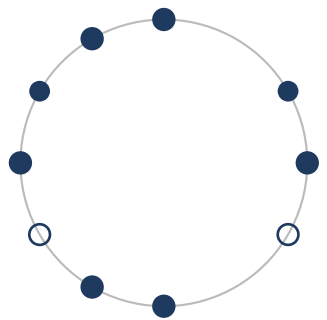


Φ_9 (order 9, no octad), $\lambda=(1,0,0)$ over $\mathbb{F}_4$
$(\omega_i/2)^N=1$, $N=36$



type $5\,3$, $\lambda=(1,0,1)$ over $\mathbb{F}_4$
$(\omega_i/2)^N=1$, $N=60$





type $6\,1\,1$, $\lambda=(1,1,2)$ over $\mathbb{F}_4$
$(\omega_i/2)^N=1$, $N=12$
